Everything Collaborative School Committees (CSCs) Should Know about the Unified Improvement Plan (UIP), School Budget and School Performance Framework (SPF)

Training title: Everything Collaborative School Committees (CSCs) Should Know About the Unified Improvement Plan (UIP), School Budget and School Performance Framework

Length of time: 90 min
(Note: If needed, the length of this training can be shortened to 20 min by cutting out the activities).

Materials needed:
- PowerPoint on Everything CSCs Should Know About the UIP, School Budget, and SPF (along with any necessary computer, projector, and AV equipment)
- A few blank flip chart sheets for writing notes
- Print outs of recent Improvement Plans from Denver schools
  - Accessible here: [http://www.cde.state.co.us/schoolview/performance](http://www.cde.state.co.us/schoolview/performance)
  - Suggest to print one for every 3–4 participants; may wish to select a range from elementary, middle and high schools
- Print outs of recent SPF Reports from the same Denver schools used for the UIP reports
  - Accessible here: [http://www.cde.state.co.us/schoolview/performance](http://www.cde.state.co.us/schoolview/performance)
  - Suggest to print one for every 3–4 participants; may wish to select a range from elementary, middle and high schools
- (Optional) Trainer may wish to review the “UIP 101 New Principal Boot Camp” and “UIP 201” PowerPoints, or other training resources, available at: [http://testing.dpsk12.org/accountability/UIP/UIP.htm](http://testing.dpsk12.org/accountability/UIP/UIP.htm) for more information on the UIP, SPF, and school budget.

Set up
- The room should be arranged into tables that either make one large circle/square, or in small groups, depending on available tables

Trainers shares the following information:
- Location of bathrooms, exits, etc.
- This training will last 90 minutes. There will not be any formal breaks, but please feel free to take care of your needs as they arise.
- Other brief announcements as needed

5 min Overview of agenda

Trainer explains:
- Collaborative School Committees, or CSCs, are designed to engage parents, teachers and the community to enhance student achievement and school climate, provide strategic direction in support of the school's mission and vision as stated in the Unified Improvement Plan (UIP), and help ensure compliance with various laws and regulations.
- Our training today will cover three main topics: the UIP, the SPF and the school budget. Learning about these things will help you as a member of a CSC.

Trainer walks through agenda, sharing a bit on each item and associated process

Share objectives for today's training

Trainer explains, “Our main goals today are that you...”:
- Gain an understanding of the CSC’s Unified Improvement Plan (or UIP).
- Gain support for the development of a CSC that understands their role with their two most important tasks supported while serving on the CSC.
- Learn about budgeting roles and indicators that guide decision-making.

15 min Unified Improvement Plan (UIP)

Trainer explains, First, we’ll talk about the Unified Improvement Plan, or UIP. I’ll share what it is, the data basis, how it’s developed and by whom, and its connection to the CSC.

What is the UIP?
- One way for Colorado schools and districts to improve student learning and system effectiveness is to engage in a cycle of continuous improvement to manage their performance.
  - The cycle includes:
    - Focus attention on the right things (performance indicators);
    - Evaluate performance by gathering, analyzing, and interpreting data about performance;
    - Plan improvement strategies based on performance data and root cause analysis; and
    - Implement planned improvement strategies.
  - Then, enter the cycle again multiple times throughout the school year
- To support this purpose, the Education Accountability Act of 2009 requires each Colorado district and school to create an annual improvement plan.
- The Colorado Department of Education has developed a **unified** improvement plan.
(or UIP) template and processes to support schools and districts in their performance management efforts.

- This process reduces the total number of separate plans schools and districts are required to complete with the intent of creating a single plan that has true meaning for it stakeholders.

What is the purpose of the UIP?

- The main goal of the UIP is to align efforts to ensure all students exit the K–12 education system ready for postsecondary education, and/or to be successful in the workforce, earning a living wage immediately upon graduation.

- To support this goal, the UIP:
  - Provides a framework for performance management
  - Supports school and district use of performance data to improve system effectiveness and student learning
  - Shifts from planning as an event to continuous improvement
  - Meets state and federal accountability requirements
  - Gives external stakeholders a way to learn about how schools and districts are making improvements
  - Serves as a two-year strategic plan.

- In addition, the UIP:
  - Aligns planning requirements for state and federal accountability into a single plan
  - Documents planning efforts in a common format
  - Includes multiple voices – including staff, families, and community representatives – and ensures that plans are posted publically
  - Promotes planning based on best practice
  - Triggers supports from the Colorado Department of Education

What is the UIP process, timeline and data narrative?

- The UIP planning process is depicted here (on slide 9):
  - UIPs provide information on the district or school's data trends, root causes and targets, and identify strategies and resources the district or school will use to improve student academic outcomes.

- A key part of the UIP is the data narrative, which describes the process and results of the analysis of the data for school improvement. The data narrative serves as a repository for everything you do in the UIP process.

- The data narrative includes:
  - Description of the school setting and process for data analysis
  - Review of current performance
  - State and federal accountability expectations
  - Progress made toward last year’s targets
  - An analysis of trends
  - Priority performance challenges
  - An analysis of root cause
  - Progress monitoring (ongoing)
- This training isn’t long enough to go through all these processes, but you can find out more information and resources on the Denver Public Schools website ([http://testing.dpsk12.org/accountability/UIP/UIP.htm](http://testing.dpsk12.org/accountability/UIP/UIP.htm))
- Plans are submitted to the Department for publication each year on April 15.

**What is the CSC role in the UIP?**
- The role of the CSC in the UIP includes providing the guidance, evaluation and recommendations in regards to the UIP to the principal.
- Ultimately, the principal creates and adopts the UIP, taking into account the advice and recommendations of the CSC.

---

**10 min**

**UIP Activity**

*Trainer explains, Let’s spend a bit of time looking through an actual UIP. You can find these online at [http://www.cde.state.co.us/schoolview/performance](http://www.cde.state.co.us/schoolview/performance).*

*Trainer asks participants to work in small groups (3–4) and passes out a UIP print out to each group. Participants may wish to work together in groups using the report representing the same level of school as their own (e.g., elementary, middle, high).*

*Spend 5 minutes working together as a group (trainer should help any groups that are “stuck”), reviewing the UIP report you have, to answer the following four questions:*

- What did you learn about the school from this report?
- What are their areas of success?
- What do they need to improve?
- What else did the UIP tell you?

*After five minutes, each group shares out a few key findings in relation to each question. Trainer should write down key findings on blank flip charts.*

*Trainer asks, Do you have any questions?*

---

**20 min**

**School Performance Framework (SPF)**

*Trainer explains, For the next topic of this training, we’ll discuss the School Performance Framework, or SPF. Now that you have an understanding of the UIP, we’ll talk about how you can evaluate it. A key to doing that is the SPF. We’ll talk about what the SPF is, what it measures and how it relates to the UIP.*

**What is the SPF?**
- The SPF is a comprehensive annual review of school performance to help schools focus on strengths and areas for targeted improvement.
- It provides a snapshot of evidence related to student growth and achievement and overall organizational strength using a variety of measures, and it is the basis of mandatory school accreditation ratings.
- The SPF also aligns district goals, state requirements and federal mandates and
What does the SPF measure?
- A wide range of measures are used to calculate ratings of how well each school supports student growth and achievement, and how well it serves students and families.
- There are seven indicators that go into the SPF:
  - **Academic Growth**: how much students are learning from year to year. Academic Growth is a meaningful measure because it applies equally to students at all academic levels—regardless of whether a student starts the year advanced, at grade level or below grade level. The Academic Growth rating tells parents how students at their child’s school are growing each year, as compared with students across the state who start the year at a similar level. Academic Growth is the category that receives the most weight in calculating each school’s overall SPF rating.
  - **Academic Status/Proficiency**: a snapshot of how well students performed on state assessments during the previous school year. A school’s rating is based primarily on the percentage of its students who scored at grade level or above grade level on state tests.
  - **College and Career Readiness** (only for high schools): measures how well a high school is preparing its students for postsecondary success. College and Career Readiness includes graduation rates, performance on assessments (ACT, Advanced Placement (AP), International Baccalaureate (IB), etc.) and enrollment in higher-level course work (AP, IB, etc.)
  - **Improvement in College and Career Readiness Over Time** (only for high schools): measures how well a high school is improving its preparation of its students for postsecondary success. This category rates each school on its successful improvement of graduation rates and performance on state and national assessments. It also measures changes in enrollment in AP and IB program coursework and college courses, as well as changes to students’ passing rates on AP and IB tests.
  - **Student Engagement**: measures how effectively a school engages and creates a connection with its students. Attendance rates, results from student-satisfaction surveys, and availability of enrichment and special education offerings are factors that are used to determine a school’s Student Engagement rating.
  - **Enrollment**: a measure of how likely students are to stay at their school from year to year. This category is included in the SPF rating as an evaluation of how effectively a school is meeting the needs of its students and families. Dropout rates are also used in calculating this rating for high schools.
  - **Parent Satisfaction**: based on responses to the DPS parent-satisfaction survey at your child’s school. It also takes into account the response rate on the survey for your school.

*Trainer asks: Which ones are most important to you and your school?*
Based on the percentage of overall points earned, schools receive one of five possible SPF ratings:
- Distinguished (80%–100%)
- Meets expectations (51%–79%)
- Accredited on watch (40%–50%)
- Accredited on priority watch (34%–39%)
- Accredited on probation (0–33%)

The ratings roll up to an overall evaluation of the school/district’s performance, which determines the plan type or accreditation rating: Performance, Improvement, Priority Improvement, Turnaround.

The DPS SPF provides information on how each school performs relative to similar schools in the district.
- The School Characteristics Indicator is a weighted calculation: FRL (40%) + ELL (20%) + SpEd (20%) + Mobility* (20%)
  *Mobility is the total number of students who entered or left the school after 10/1 divided by the number of students in the school as of 10/1).
- Schools are then rank-ordered by education level and compared with 10 schools that are closest to them.

Tying it back to the UIP...
- The SPF provides a common framework through which to understand performance and focus improvement efforts, which inform the UIP and how it is created.

### SPF Activity

*Trainer explains, Let’s look again at real reports. You can find SPF’s online in the same place as the UIPS, at: [http://www.cde.state.co.us/schoolview/performance](http://www.cde.state.co.us/schoolview/performance).*

*Trainer asks participants to work again in their small groups (3–4) and passes out the school’s corresponding SPF print out to each group.*

*Once again, please spend 5 minutes working together as a group (trainer should help any groups that are “stuck”), reviewing the SPF report you have, to answer the following four questions:*

- What did you learn about the school from this report?
- What are their areas of success?
- What do they need to improve?
- What else did the SPF tell you informed the UIP you reviewed from the same school?

*After five minutes, each group shares out a few key findings in relation to each question. Trainer should write down key findings on blank flip charts.*

*Trainer asks, Do you have any questions?*
**Training:** For the final topic of this training, we’re going to talk about the school budget, including how it is created and how it relates to both the UIP and to CSCs.

**As we’ve learned:** The UIP should be created based on the data available, driven in large part by the data in the SPF. The school budget should reflect what those UIP plans are in need of.

**How is the school budget created?**
- The school budget is created by multiplying the number of students by the per-student base to get the school student-based budget allocation.
- The number of students at a school is the single largest factor in the funding at a school.
- Many different funding sources are distributed to schools on a per student basis, depending on whether students fall within the categories that the funding is designed for, such as free-reduced lunch (FRL), CELA and Title I.
- Some expenses in the support of schools are not budgeted at the school, but instead managed by central departments such as severe special education, facilities, custodial and transportation.

**What is the history of the school budget?**
- *Trainer reviews key points on PowerPoint slide 22, providing a big-picture overview of key points*

**What is the timeline?**
- In early January, the final projections of student count are sent out.
- Later that month, HR partner and financial partner meet for a budget development pre-meeting.
- In early February, budget development/school staffing one-on-one meetings are held with principals, financial partners and Human Resources school partners.
- Then, in early March, the final school budget, Title II plans, and other completed forms are due to budget office.
- Lastly, fall adjustments are made in early September. Fall adjustment is the process used to adjust the funding allocation given to each school based on the difference between projected enrollment, which is used when developing the initial budget and actual enrollment based on the actual count done in September.

**What is the CSC role in the school budget?**
- School leadership teams, in coordination with the CSC and other stakeholders, use the allocation to “purchase” the staff and other expenses at a school.
- The overall focus is on positions not people.
- CSCs provide guidance, evaluation and approval for:
  - The annual school budget to ensure its alignment with the UIP and the school’s program design
  - The use of the staffing allocations provided by the district as it relates to the SIP, school budget and school program design, including consultation
- regarding adjustments that may be made due to pupil-count issues
  - School leaders have a large amount of autonomy over the use of funds.

*Review (briefly) allocations in PowerPoint slides 25 to 29*

*Trainer asks, Any questions on the school budget or its relation to the UIP or CSCs?*
