Consensus Decision-making Process

*Consensus*: The decision is unanimous or a majority decision that the entire committee will implement and support.

*Based on:*

- Understanding of relevant information
- Participation by all group members
- An understanding of different perspectives, concerns, needs and recommendations *(you have listened to others and they have listened to you)*
- Creative efforts to accommodate different viewpoints and needs
- A willingness to raise and understand disagreement and address the underlying needs manifested in disagreement

*At the end, you should support the decision as if it were your own.*
Consensus Decision-making Process (contd.)

Fostering this type of process requires

- An environment of mutual support and respect
- Independence of the members
- An informed member base with access to relevant information

Facilitation may be requested whenever three CSC representatives agree to improve the collaborative decision-making process.
Consensus Decision-making Process (contd.)

If consensus cannot be reached

• The CSC shall seek facilitation assistance from the Instructional Superintendent

• If timing does not permit further delay, the principal may make an impasse decision
ACTIVITY!

Your school has been offered an opportunity to participate in an innovative new program called MathDance! MathDance! was developed by Harvard educators and combines physical movement with grade-level math skills, and engages students of all levels into creative movement and math-related brain exercises. The 1-hour, 1x/week program is offered during regular school time, and shares time with both Math and Physical Education/Health classes (meaning that those classes are shortened by 30 minutes each week to accommodate the program). Math and Physical Education teachers are asked to use the time they typically spend in instruction collecting data for the program.

During test groups, MathDance! was found to dramatically increase the math skills of students (leading to higher test scores in math). Both male and female test students reported thoroughly enjoying the dance activities. Most teachers raved about the program, however Math and Physical Education teachers criticized the program overtaking their instructional time.

The program usually costs $100 per student, per year, but will be offered to your school for free for the next five years to test the program before it is launched to other schools.

**Do you choose to invite this program into your school?**

*Please assume that the decision is entirely up to your small group, and has to be made now (e.g., you cannot choose to poll teachers, etc.).*
Reminder: Consensus Decision-making Process
